Hilti Inc.

Re: Hilti Mechanical Fastening System

Gentlemen,

Amfab Steel Erection Division has been using the Hilti power actuated products for attaching our decking to joists and structural steel for well over a year now. Many of us have been using Hilti mechanical attachment systems for many years.

At Amfab Steel Erection Division we use the DX 860 HSN stand up tool to attach deck to joists and the DX 860 ENP-L stand up tool to attach deck on our structural steel projects. Both tools are well designed for easy use by our decking workers, and clearly designed for easy cleaning and maintenance. Compared to traditional puddle welding of deck, the actual attachment time and worker fatigue/injuries have been greatly reduced with the use of this system.

Our Hilti Representative, Blaine Seipert and his team of engineers have been very professional and expeditious when we have called on them to work with our construction teams during the submittal process through job completion.

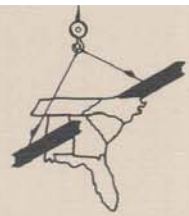

Please feel free to contact me at anytime should you require any other information regarding the use of the Hilti Mechanical Fastening System.

Sincerely,

Brian Dobie
ASED Project Manager

RE: Hilti Decking Systems

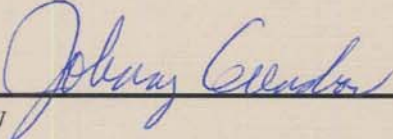

We have been a Hilti decking customer for the past 15 years, and have found the Hilti System to be the most productive method of attaching metal roof decks on our project.

We fasten decking on a wide range of projects. With the Hilti pinning system we are able to fasten three to four times faster than with tradition puddle welding. The Hilti Pinning System is simple to use and very fast to learn.

We, Williams Erection Company, have attached many roof decks with the Hilti pinning system such as: The Georgia World Congress Center, The Georgia Aquarium, The St. Regis Hotel in Atlanta, and Shingle Creek Resort in Orlando.

Each one of these project we have had good support for the local Hilti Representatives namely Radu Mondan, and Seth McLeod. We were able to finish each project much faster than if we were to have welded these roof decks. With the Hilti Pinning system we are able take the most costly part of the project, which is the labor cost, and cut it to a minimal amount.

The Hilti system not only contributes to our productivity on the jobsite but is also a very reliable fastening solution. The fastenings are also of the highest quality. The fastenings are easy to inspect by the guys on site, and also are easy for the inspectors to approve.

Gentlemen,

We started using the Hilti DX 460 MX SM for our steel decking fastening system about 5 years ago. We saw increased productivity right away with the DX 460, and found greater efficiency with the DX 860-HSN. We have installed various gauge decking in bar joist and structural steel.

Hilti's engineering department has been very responsive to floor and roof decking submittal requests that we forward to the project's engineer of record.

Tim Wilson, Hilti sales rep., has been great training GHC's employees to use and maintain the equipment.

We will continue to use the Hilti deck fastening system because of the efficiency and service.

Sincerely,

Scott Zellmer
Project Coordinator

HILTI INC.

Gentlemen,

We used the Hilti DX860 ENP-L and the DX76MX gun with .27 Cal Red Boosters and sheet metal X-ENP-19-L15 nails.

We installed 18 ga. N-decking to heavy structural steel. We had 8,000 S.F. of decking. The job was completed in 6 hours. This job was for the Port of Los Angeles.

The support team from Hilti was fantastic; your sales rep Ryan Calderon was extremely helpful. We will be using this system on the rest of our decking jobs.

Should you have any questions or require further information please feel free to contact our office.

Sincerely,

G & W BUILDERS, INC.

Re: Hilti DX Decking System

To whom it may concern,

Our company has grown to be one of the largest decking supply and install company in the greater Vancouver area over the last few years. We have benefited greatly from our partnership with Hilti for several reasons.

Quality workmanship is something we pride ourselves on and feel the reliability of the Hilti pins and collated side lap screws is the best product we can offer our customers.

The speed at which we can complete a deck installation has made the Hilti system very attractive to us and now estimate we use the DX860 tools for 80% of all our work each year.

Our crews much prefer working in an upright position and no longer breathe in the toxic welding fumes. We have several welders working with this Hilti system and they have nothing but good things to say about the health benefits they have experienced.

When it comes to field support Hilti has always been a phone call away and we feel this has been instrumental in building a solid long lasting relationship between our two companies.

If you have any further questions regarding this matter please feel free to call me directly.

Sincerely,

Hilti Inc.

Gentlemen,

This letter is to express our up most satisfaction for Hilti, not only their products, but also their inside sales rep Blaine Serpiet's customer service.

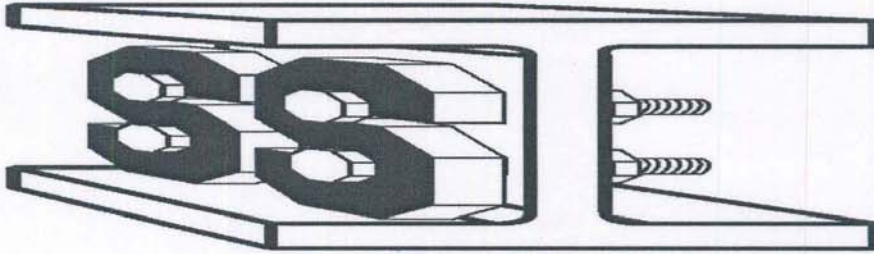

We have been using the hilti deck system now for a little over two years and have greatly increased our production overall on our projects.

As well as a great product Hilti has also offered our company the absolute best customer service hands down.

With Hilti's knowledgeable and customer orientated sales staff we at C&C Steel Erectors look forward to doing much more buisness with Hilti in the future.

Sincerely,

Colton Chynoweth
Project Manager

HILTI, INC.

To Whom it May Concern,

We at Sabre Steel, have used the Hilti DX 860 HSN with the EDNK 19 pins on several of our jobs. These jobs have ranged in size from 20,000 sq ft to our current job that we are doing which is over 200,000 sq ft.

The support we get from Hilti has been very good. Blaine Seipert here in the Salt Lake City area is always there to help us with your system from the submittal process clear through to the final sign off by the inspectors.

We at Sabre Steel are impressed with the speed and efficiency of the Hilti Decking System and plan on continuing using it from now on. If you have any other questions or wish to speak to me personally, please feel free to call.

Sincerely,

Sabre Steel LLC

If you can "think" it, we can "build" it!

To whom it may concern:

We did a Walgreens in Orem, Utah, July, 2007.

Jobs like this can be stressful, especially with time limits. It was comforting to have the job go so smoothly because of Hilti tools, and also knowing Hilti was right there to see our needs were met.

The salesman at that time for us was Blaine Seipert. He was very quick and efficient to get us the supplies we needed in a timely manner. And help us through sticky situations. We were very happy with Hilti and their products.

We will definitely use Hilti and their roofing tools in any of our future jobs.

Thank You

Kent Barber/President

To: Hilti

From: Hershel Lynch

RE: Hilti Decking Systems

We have been a Hilti decking customer for the past year and have found the Hilti Decking System to be a critical part of our project timelines.

In our recent project we had used the Hilti DX860 ENP-L and DX 76MX to attach 20 Ga type N deck to structural steel. The project, the new KIA AUTO PLANT in West Point, GA has proven to be a success for us by using the Hilti system.

The Hilti system not only contributes to our productivity and speed on the jobsite, but is also a very high quality fastening solution for all types of decking. Hilti representatives, Radu Mondan and Charles Abernathy were always on hand to provide training before the project started, and throughout the entire project.

I would like to end by thanking Hilti as a company for providing outstanding service and will be in contact with Hilti to pin other roof decks in the future.

Should you require more information please don't hesitate to contact our office.

Sincerely,

A handwritten signature in black ink that reads "W. Hershel Lynch".
